**Subject:** Re: Send your Dimock questions here...

Hi Roy,

I now have just two questions to be answered. Please find them below. Thanks!

In response to EPA's decision to deliver water to Dimock, Cabot Oil & Gas issued a statement:

" Cabot has reexamined the data relevant to EPA's January 2012 statement. Based on this reexamination, it appears that EPA selectively chose data on substances it was concerned about in order to reach a result it had predetermined. EPA chose to include specific data points without adequate knowledge or consideration of where or why the samples were collected, when they were taken, or the naturally occurring background levels for those substances throughout the Susquehanna County area. The end result is an unwarranted investigation and unnecessary delivery of water." Did EPA selectively choose data on substances it was concerned about in order to reach a result it had predetermined?

Has the sampling of the approximately 60 homes in the Carter Road/Meshoppen Creek Road area of Dimock been complete? If so, what did the results conclude? If not, when are they expected to be complete?

Thanks,

Taylor Mirfendereski

Taylor -- Sorry, but I am not going to be able to meet your deadline for Friday with answers to these specific questions. However, here is a link to our Jan. 19 press release: [EPA to Begin Sampling Water at Some Residences in Dimock, Pa.](#) and below is desk statement we issued on January 26. These should answer some of your questions and provide you with some helpful background:

EPA is in this community sampling and providing water as a direct result of requests from Dimock residents. Our priority is the health of the people there, and our actions are guided entirely by science and the law. We are providing water to a handful of households because data developed by Cabot itself provides evidence that they are being exposed to hazardous substances at levels of health concern. We are conducting monitoring as a prudent step to investigate these concerns and develop a sound scientific basis for assessing the need for further action. This is consistent with steps we would take in any situation where we are presented with potential health risks to citizens under the federal laws we are charged to carry out.

In his State of the Union address, President Obama made clear that he is committed to tapping America's natural gas as part of a new era in American energy. He also affirmed our commitment to "developing this resource without putting the health and safety of our citizens at risk."

We have been clear that if we see an immediate threat to public health, we will not hesitate to take steps under the law to protect Americans whose health may be at risk. The Agency also welcomes PADEP and Cabot's participation in the sampling. Without a doubt, EPA's samples will be collected and reviewed using the highest scientific standards and we will take into account all other relevant and reliable data developed by PADEP and Cabot. The residents in Dimock deserve answers based on the facts, and we look forward to working together to meet our responsibility to this community.

=====  
What prompted the EPA's decision to deliver fresh drinking water to residents in Dimock, PA?

How was the decision made?

Why did the EPA decide to get involved?

When did the EPA get involved?

When did the EPA start delivering water? How long is this expected to continue?

How many homes in Dimock, PA had their water sampled? On what roads?

What chemicals were found in the homes that received water?

What levels of the chemicals were found in the homes?

What harmful effects could these chemicals have to those who are exposed?

Did the EPA test water in cities other than Dimock? (ie: Bradford County) If so, what did you find? If not, do you have the intention of testing homes in that county?

Why didn't all homes with contaminated water get fresh water delivered? (ie: the home o

Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy on Carter Road)

How many water wells in Dimock were affected by the drilling? How many wells were fauled by stray methane gas from Cabot's drilling operation.

Is the sampling complete?

If a person's well contains methane, what precautions should they take?

Has the contaminated water caused any health risks?

What steps is the EPA taking to ensure that Pennsylvania residents have access to safe drinking water?

Has the EPA determined whether or not water contamination is linked to fracking?
